

The diagram illustrates an NTC fan speed control circuit. It features a +5V power supply connected to a 10k NTC resistor (R11). This resistor is in series with a 10k POT resistor (R12). The wiper of the POT resistor is connected to the base of an IRLML2402TRPBF MOSFET (IC2). The MOSFET's source is connected to GND, and its drain is connected to the fan socket (J3). The fan socket has pins 1 and 2, with pin 1 being the common ground and pin 2 being the power supply.
